

Spanish Know-how.

Tradition and know-how is a characteristic feature that defines the international leadership that Spain represents. Within the world ceramic sector, is positioned as a leader in terms of technological development, design, product quality and service.

It is this character that gives us prestige, recognition and fame. A work that is carried out with the maximum of quality requirements and that results in being the reference worldwide. A know-how that has been exported to other countries and which has led to the birth of this industry abroad.

NIRO GRANITE | MADE IN SPAIN 

Cement

Over the years, cement has gradually emerged as the beloved cornerstone of minimalist design and it is easy to understand why: Whether rough-hewn or refined, cement looks good either way. Plus, its beauty lies in its raw nature that so often contributes to an unexpected touch. Cement by Niro Granite, comes in various sizes of 100x100cm, 60x120cm, 75x75cm and 60x60cm in matt surface that could easily exemplify the beauty to your living space.
